## DETAILED ACTION

### *Response to Amendment*

1. Due to the new grounds of rejection on claim 1, this Action is **Non-Final**.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-11 and 13-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 1 limits "at least one wing member" and then further limits "...which can engage another such wing member." The Specification fails to enable an embodiment whereby only one wing member ("at least one wing member") exists, but wherein said wing member has an engagement element to engage another such element. Thus, the limitation inherently requires a second wing member. It is suggested Applicant amend the claim to say "at least two wing members.
